

Please do not stop XM from providing continuous weather and traffic reports! This is a great service that I have come to rely on as I travel locally and to distant areas. I consider it a public service. None of the local radio channels provides continuous weather and traffic reports 24x7. Only XM has seen fit to provide this wonderful service to its subscribers AT NO EXTRA CHARGE.

Do not allow the National Assoc of Broadcasters to petition you successfully. Your primary duty is to the listening public not to the NAB or its members. I will hold your agency accountable if you allow the NAB to adversely affect XM's traffic and weather coverage!
